Education

San Jose State University(SJSU)

Aug 2023 - May 2025

Master of Science in Software Engineering

GPA - 3.8

Relevant coursework: Cloud Computing, Distributed Systems, Enterprise Software Platforms, Software Systems Engineering, Data Structures & Algorithms, Virtualization Technologies, Machine Learning, App Development

Experience

Jio Platforms Limited

July 2021 - July 2023

Software Engineer

Mumbai, MH, India

- Engineered the **Re-imagined Procurement Platform**, a scalable enterprise solution enabling **1000+ vendors and buyers** to streamline procurement, invoicing, and approvals with **99.9% uptime**.
- Designed and enhanced the **Purchase Order (PO) and Joint Measurement Sheet (JMS) modules**, automating order creation and service payment tracking, cutting **manual effort by 40%**.
- Developed **30+ RESTful APIs** with **Node.js, Express.js, and MongoDB**, ensuring seamless transactions for **5,000+ daily users** while maintaining **99.9% uptime**.
- Constructed **reusable UI components** (date pickers, dropdowns, pagination) using **React.js and TypeScript**, accelerating feature delivery by **30%**.
- Refactored MySQL and MongoDB queries with **compound indexing and aggregation pipelines**, reducing query response times from **400ms to 80ms**.
- Implemented **Kafka event streaming** for real-time vendor notifications, processing **3,000+ events daily** to enhance operational efficiency.
- Spearheaded CI/CD pipelines with **Docker, Kubernetes, and Jenkins**, minimizing deployment failures from **10% to under 2%** and enabling zero-downtime releases.
- Deployed and managed cloud-native microservices on **AWS (EC2, S3, Lambda)** to enable auto-scaling, reducing infrastructure costs by **20%** while maintaining high availability.
- Conducted **thorough code reviews** and enforced best practices, leading to **90% unit test coverage** using **Jest and Mocha**.

Ken42 EdTech Pvt. Ltd.

Mar 2021 - June 2021

Software Engineering Intern

Bengaluru, KA, India

- Developed an interactive **student course catalog and enrollment system** with **React.js and Material-UI**, improving navigation for **1,500+ students**.
- Integrated **Salesforce CRM**, automating student data synchronization and reducing manual workload by **25%**.
- Implemented **secure role-based access control (RBAC)** via JWT authentication, achieving **200ms API response times**.
- Enhanced React component lifecycle and introduced lazy loading, cutting initial page load times by **25%**.
- Collaborated with **product managers and QA teams** to resolve high-priority issues, decreasing customer-reported bugs by **15%**.

Projects

CryptoWise: Intelligent Trading and Insights Platform | *React.js, Node.js, Smart Contracts, MetaMask, OpenAI 3.5*

- Designed a full-stack cryptocurrency platform using React.js and Node.js, delivering real-time insights and automated trading, improving data accuracy by 25%.
- Integrated OpenAI 3.5 chatbot for handling live and historical queries, enhancing user query response time by 30%.
- Deployed automated trading via Smart Contracts and MetaMask, securing transactions through predictive analytics.

Movie Theater Club App | *Typescript, Node.js, React, HTML, CSS, MongoDB, AWS, Mantine*

- Built a movie theater app with JWT authentication, securing 3 user roles, achieving 99.9% uptime.
- Deployed AWS app with auto-scaling across 4 EC2 instances, supporting 10,000+ ticket purchases.

Technical Skills

Languages: Java, Python, C, C++, JavaScript, HTML, CSS, Node.js, Go, Docker, Terraform, Elastic Search, Kafka

Frameworks: React, Material-UI, PyTest, Spring Boot, Express.js, Storybooks, Jest, Django, FastAPI, JUnit 5

Technologies: Docker, Terraform, Elastic Search, Kafka, gRPC

Cloud: Amazon Web Services (AWS), Google Cloud Platform (GCP), Firebase

Databases: PostgreSQL, MongoDB, Redis, MySQL, DynamoDB, Neo4j

Achievements

Hackathons : Winner of CalHacks 11.0 - University of California, Berkley

Participations : TA for Enterprise Distributed Systems Course | Volunteer and Co-ordinator of a student club
