Education

San Jose State University(SJSU)

Aug 2023 - Dec 2024

Master of Science in Software Engineering

GPA - 3.8

Relevant coursework: Cloud Computing, Distributed Systems, Enterprise Software Platforms, Software Systems Engineering, Data Structures & Algorithms, Virtualization Technologies, Machine Learning, App Development

Experience

Jio Platforms Limited

June 2021 - July 2023

Software Engineer

Mumbai, MH, India

- Developed a customer-facing dashboard for real-time transaction tracking using **React.js** and **TypeScript**, improving user engagement by 20% and reducing complaint resolution time by 15%.
- Built reusable UI components, including date pickers, dropdowns, and pagination modules, enabling a 30% reduction in frontend development time across projects.
- Designed and implemented RESTful APIs with **Node.js** and **Express.js** to support payment processing and user management, achieving 99.9% uptime and handling 5,000+ daily transactions.
- Collaborated with functional and business teams to gather requirements and clarify API logic, ensuring alignment with business objectives and reducing development rework by 20%.
- Integrated **Redis** for session management and **Kafka** for event streaming, processing over 3,000 real-time notifications daily to support analytics workflows.
- Optimized database queries in **MySQL** and **MongoDB** by creating compound indexes and aggregation pipelines, decreasing query times from 400ms to under 80ms.
- Streamlined CI/CD pipelines using **Docker**, **Kubernetes**, and **Jenkins**, ensuring 95% deployment success and zero downtime during updates.
- Led the creation of an analytics dashboard using **React.js** and **Chart.js**, providing real-time insights into customer behavior and reducing error detection time by 15%.
- Engineered scalable microservices for user authentication and payment processing, supporting modular application design and reducing time-to-market for new features by 30%.

Ken42 EdTech Pvt. Ltd.

Mar 2021 - June 2021

Software Engineering Intern

Bengaluru, KA, India

- Designed and implemented a dynamic course catalog and enrollment system using **React.js** and **Material-UI**, enabling seamless navigation for over 1,500 students.
- Integrated **Salesforce CRM** with internal systems to automate student data synchronization, reducing manual processing time by 25%.
- Enhanced application performance by optimizing React component lifecycles and implementing lazy loading, reducing page load times by 25%.
- Created RESTful APIs to support secure role-based access control (RBAC) and data fetching for student, faculty, and admin portals, achieving a consistent 200ms response time.
- Collaborated with product and QA teams to debug and resolve high-priority issues, decreasing customer-reported bugs by 15%.

Projects

CryptoWise: Intelligent Trading and Insights Platform | *React.js, Node.js, Smart Contracts, MetaMask, OpenAI 3.5*

- Designed a full-stack cryptocurrency platform using React.js and Node.js, delivering real-time insights and automated trading, improving data accuracy by 25%.
- Integrated OpenAI 3.5 chatbot for handling live and historical queries, enhancing user query response time by 30%.
- Deployed automated trading via Smart Contracts and MetaMask, securing transactions through predictive analytics.

Movie Theater Club App | *Typescript, Node.js, React, HTML, CSS, MongoDB, AWS, Mantine*

- Built a movie theater app with JWT authentication, securing 3 user roles, achieving 99.9% uptime.
- Deployed AWS app with auto-scaling across 4 EC2 instances, supporting 10,000+ ticket purchases.

Technical Skills

Languages: Java, Python, C, C++, JavaScript, HTML, CSS, Node.js, Go, Docker, Terraform, Elastic Search, Kafka

Frameworks: React, Material-UI, PyTest, Spring Boot, Express.js, Storybooks, Jest, Django, FastAPI, JUnit 5

Technologies: Docker, Terraform, Elastic Search, Kafka, gRPC

Cloud: Amazon Web Services (AWS), Google Cloud Platform (GCP), Firebase

Databases: PostgreSQL, MongoDB, Redis, MySQL, DynamoDB, Neo4j

Achievements

Hackathons : Winner of CalHacks 11.0 - University of California, Berkley

Participations : TA for Enterprise Distributed Systems Course | Volunteer and Co-ordinator of a student club
